Please check the listed pricing online at rnib.org.uk/shop or with our Helpline on **0303 123 9999** before purchasing.

Placing your order

Payment is required when placing your order.

Buy direct from our easy-to-use online shop: **rnib.org.uk/shop**

Call our Helpline on **0303 123 9999**. Our Helpline is open Monday to Friday at 8am to 8pm and on Saturday at 9am to 1pm.

Email **helpline@rnib.org.uk**

You can also connect through an Alexa-enabled device by saying **"Alexa, call RNIB Helpline"**.

Schools and organisations can email **kaorders@rnib.org.uk** to place an order.

We accept Visa, Visa Debit, Switch Visa Debit, Mastercard and Electron.

Alternatively, you can send us a cheque or postal order with your order, payable to RNIB, at:
RNIB
Northminster House,
Northminster,
Peterborough, PE1 1YN

Special orders

We work with partners to deliver products on our behalf. Where a product is listed as "Special order" we will pass on your contact information to be able to deliver the product effectively. We may quote extended delivery times, outside of our standard terms and conditions, for these products. For further details, visit our online shop at **rnib.org.uk/shop** or contact our Helpline on **0303 123 9999**.

Keep up to date

Be one of the first to hear about our new product launches and special offers by subscribing to our **New Product Guide**. Call the Helpline on **0303 123 9999** to sign up for the braille, audio, large print or email formats.

For demonstrations of our most popular products, or to see presentations by blind and partially sighted people, visit **youtube.com/user/rnibuk**, and view the RNIB Products playlist.

To find all services in your area supporting blind and partially sighted people, visit **sightlinedirectory.org.uk**

Products for Life Store

Our Products for Life Store consultations are a great way of finding out about the products we offer and give you the chance to try before you buy.

Chat to our Product Coordinators by phone or video call, or visit one of our three stores in Belfast, Edinburgh or London.

Please view our opening times and book your appointment at rnib.in/ProductsStore so that we can schedule time to help with your queries.

Understanding our pricing

Many of our products have been specially designed, which means blind and partially sighted people – or anyone buying on their behalf – will not pay VAT on these products. Where there is one price listed, everyone pays this price; this may be the price inclusive of VAT or a zero-VAT rated item. Where there are two prices listed, blind and partially sighted people – and anyone buying on their behalf – can pay the lower price which excludes VAT. **Zero-VAT** and **ex VAT** prices are shown in pink, **inc VAT** prices are shown in black.

Prices are correct at time of publishing and VAT is 20 per cent. Both may be subject to change. For the latest prices, please call our Helpline or visit our online shop.

Whenever you buy a product from our online shop, you are helping RNIB to support people with sight loss.

Information about energy usage

On our online shop RNIB's electrical products are listed with their power consumption. The cost of running these products will depend on individual energy supplier's charges.

Reading

UE
66

Discover our free Library services and enjoy your favourite novels in your preferred format. Sign up to RNIB Newsagent for newspapers and magazines and get support for learners from RNIB Bookshare.

RNIB Newsagent

Our Newsagent service provides a wide range of newspapers and magazines in audio, braille and electronic text. You can also listen to your favourite magazines, plan your week's TV or radio choices with our **Big Print** guides, and get your newspaper delivered by email or on CD. Visit rnib.org.uk/newsagent

RNIB Library

You can download or borrow books and music scores for free from our Library – the largest of its kind in the UK. Download Talking Books, eBooks and electronic braille books through our online Library, and keep them on your phone, tablet, PC or smart speaker. Or, if you prefer physical audio or braille books, you can join our postal Library and have these delivered to your home. Visit rnib.in/Books

RNIB Bookshare

If you're studying at school, college or university, RNIB Bookshare offers a free collection of textbooks and educational materials to support the UK Curriculum. Our range of

accessible formats can be read electronically and adapted to suit the personal reading needs of learners. Visit rnibbookshare.org

RealSAM Pocket

RealSAM Pocket is a reading device designed to make accessing RNIB Newsagent and Talking Books simple through voice operation: just say "read the Guardian", or "find books by Agatha Christie". It's also a talking mobile phone, so you can say "call John" or "add a contact for Jane Smith".

RealSAM Pocket is great value, offering access to the latest in voice-controlled technology, a subscription to RNIB Newsagent, Talking Books, unlimited UK calls, texts and a choice of mobile data with O2 as part of a simple, monthly subscription.

To order, please call RealSAM's dedicated helpline on **01733 514 612**, or email RealSAM Pocket directly at helpline@realsam.co.uk

USB and media players

Some of our tabletop and portable DAISY players also support playback of content on USB memory sticks.

RNIB USB-Communiplayer

It's easy to sync your smart device, via Bluetooth, to the RNIB Communiplayer and have it act as a speaker to play your music, audiobook or podcasts. The Communiplayer also supports content on a USB memory stick.

This small, portable media player has a built-in rechargeable battery, which lasts up to eight hours, so you can move it easily from room to room, and into your garden or workshop.

The player has black casing with contrasting large, tactile white buttons. Bookmarking is automatic when the player is paused or stopped. When the USB stick is removed and reinserted the player will automatically start playing at the point you left off. The player can bookmark up to 20 individual USB sticks, but you cannot add multiple bookmarks to a single USB stick.

DH475 **£34.99** **£41.99**

In the box

- Mini-USB to USB charger cable

Additional items

- HT376 USB charger plug

RNIB Accord USB player

The RNIB Accord combination USB player and Bluetooth speaker is our most advanced audio device and designed specifically for blind and partially sighted users, with easy-to-use tactile controls, easy-to-locate ports, bookmarking features and chapter skipping function.

Small, light and highly portable, you can listen to Talking Books on USB and any other audio via Bluetooth – podcasts, BBC Sounds, Audible audiobooks, your 'dance like nobody's watching' playlist. If your smartphone or tablet can play it, you can listen to it on the RNIB Accord.

The rechargeable battery provides five to six hours listening on a full charge. Simply place the RNIB Accord on to the Qi wireless charger provided and hear the player announce when it is correctly positioned for charging.

With its high quality speaker, the RNIB Accord is the perfect way to listen to your favourite things in the living room, kitchen, garden or shed. And you can easily move it with you as you go about your day.

Stylish and modern-looking, it has a black case with contrasting white buttons. The volume control buttons are a large, tactile plus and minus sign on one side of the device, designed to be easily located by touch. They also function as chapter skip forward/backward buttons.

Its two other control buttons and all ports are on top of the device for ease of use. The round, white power button is engraved with a power symbol, and the white book/folder skip button is distinctly smaller and smooth. The power button also functions as the play/pause button.

The RNIB Accord gives voice prompts in a clear, natural, English male voice to indicate battery, Bluetooth, charging and software update status. It will also speak when headphones, a USB stick, or an SD card are connected/disconnected and when a control button is pressed.

DH472 **£49.99** **£59.99** **+ Coming soon**

In the box

- USB-A to USB-C cable
- Qi wireless charge pad
- Micro-USB to USB-C cable

Additional items

- HT376 USB charger plug

DAISY is a high-quality audio recording with the benefit of browsing, skipping to a new chapter or inserting bookmarks.

Victor Reader Stratus DAISY MP3 player

All Victor Reader Stratus audiobook players feature large, tactile, high-contrast keys, a built-in speaker and headphone jack, and self-voicing controls, making them easy to use. These players can be used at home or out and about thanks to their rechargeable battery and integrated carrying handle.

Features include variable playback speed, sleep timer, and an information key to announce details of the content you're reading, such as book title and time remaining. The "Where am I?" feature lets you know where in the book you are, and the key describer announces the function of each key.

The Stratus 4 models have a simple four-arrow keypad to easily navigate novels, magazines, and newspapers. Alternatively, the Stratus 12M provides a telephone-style number pad for navigation to specific pages in highly structured publications such as reference and textbooks.

Attach the optional keypad cover to hide all but the most essential keys to simulate a traditional cassette player.

In addition to playing CDs, the Stratus M model supports USB memory stick and SD card. With its built-in text-to-speech (TTS) capability, you can play computer text documents saved to these external media options.

Never lose your place – your player will automatically resume reading where you left off, regardless of how many books you're reading. Use the bookmark function to mark important places in your document.

The battery takes four hours to fully charge and lasts up to 10 hours when playing DAISY audiobooks, but varies with other audio formats. A two-year warranty and spare charger (**DD63**) available separately.

DD65

Victor Reader Stream (New Generation)

This pocket-sized player has well-spaced buttons in an easy-to-use layout. It plays a wide variety of file formats, so you can enjoy books, music and documents, in both audio and text-to-speech (TTS) formats. Listen using the built-in speaker or headphones. Supplied with a 4GB SD card, silicone case, rechargeable battery, mains charger, earphones, two USB cables, and a full audio user guide installed. The battery lasts for up to 15 hours when listening to audio books, or eight hours when using the voice recorder. This player comes with a two-year warranty.

DD65 **£370.00** **£444.00**

HT278

Victor Reader Trek – player and GPS

All the great features of the Victor Reader Stream with added GPS. Navigate the world around you while reading the latest book on your list or listening to your favourite podcasts. Using TomTom maps, with the press of a button, Trek will tell you your current nearest address, the direction you're travelling in and next instructions for the route you're following. Simply drop a voice-tagged landmark to receive turn-by-turn directions to that exact point. You can then easily get back to your reading material exactly where you left off. Supplied with a USB cable, power adaptor, belt-clip and lanyard, headphones and weather-resistant carrying case. This player comes with a two-year warranty.

HT278 **£725.00** **£870.00** ▲ Special order

Braille displays

Enjoy your favourite books and magazines in refreshable electronic braille.

HT358

Orbit Reader 20

This compact and revolutionary braille display offers easy book reading and note-taking at an affordable price. The Orbit Reader 20 is portable and features 20 refreshable eight-dot braille cells. It offers reading books via SD card, simple notetaking, Bluetooth and USB connectivity. The Orbit Reader 20 from RNIB comes with pre-installed content, including a variety of books and the Oxford English Dictionary.

HT358 **£580.00** **£696.00**

HT358PLUS

Orbit Reader 20 Plus

The same size and functionality as the Orbit Reader 20, the Plus also features a calculator and onboard forward and backward translation which supports more than 40 languages. Includes a clock/alarm, calendar and calculator.

HT358-PLUS **£695.00** **£834.00**

Orbit Reader 40

This reader features 40 refreshable eight-dot braille cells. In book reader mode you can read your favourite book and files from SD card or USB. Note-taker mode enables you to take notes and edit files. When in braille display mode, you can connect with up to five devices over USB and Bluetooth. Works with all popular screen readers. Onboard forward and backward translation supports more than 40 languages. Includes a clock/alarm, calendar and calculator.

Brailiant BI 20X and Brailiant BI 40X

Humanware's Brailiant BI X braille displays are packed with customizable features and are the first to include text-to-speech, bringing you closer to a hybrid notetaker feel. Choose the extremely portable 20-cell Brailiant BI 20X **HT395** or the future-ready Brailiant BI 40X with 40 cells **HT396**.

Both devices can pair with five Bluetooth devices and one USB device simultaneously. And by allowing you to speak the word under the cursor and announce an unfamiliar word, the text-to-speech feature promotes braille proficiency, making it easier to switch from uncontracted to contracted braille.

You can also customize the main menu, configure HumanWare's signature thumb keys, select the braille table, and adjust the auto-scroll speed to suit your reading preferences and maximize your comfort.

The KeySoft Lite editing application makes discreet note taking a pleasure and with up to 32GB of usable internal storage and the included onboard translation ensuring compatibility with various file types, managing data has never been easier.

Once paired with your screen reader via Bluetooth or USB connections, emailing, saving, and transferring documents of various file types couldn't be easier.

The Brailiant BI 20X is a smart and compact braille display, designed to bring you mobility, comfort, and efficiency at all times, while the Brailiant BI 40X is uniquely powered by Bluetooth 5 wireless technology to double your pairing speed and quadruple your range, providing a more reliable and stable connection for an outstanding user experience.

Both devices have an eight-dot Perkins keyboard with two space bars, and the Brailiant BI 40X also has six command keys. The devices are compatible with JAWS 18 and above, Dolphin SuperNova, NVDA, VoiceOver iOS and MAC iOS.

Battery life is 20 hours, with recharging via a USB-C cable.

Scan and read

If reading text is difficult, there are machines that will scan and read the content out loud to you – whether that’s a book, a letter from the GP or a newspaper.

For information or advice on technology that will be suitable for your needs, please contact our team on **0303 123 9999** and speak to one of our advisors within the Sight Loss Advice Service.

Orcam Read Smart

This lightweight, handheld device uses a smart camera and AI technology to read out text from any printed surface or digital screen. Just point it towards the text and press a button to hear it instantly read from books, newspapers, smartphone screens, computers, and more. It can also recognise barcodes and detect currency. Listen via the mini speaker on the device, through wired headphones or via Bluetooth headphones or speaker.

HT387 **£2,000.00** **£2,400.00** ◆ New

Smart Reader HD

This lightweight, portable reader/scanner has large, user-friendly, tactile control buttons and is designed to be a fully integrated reading solution for people with low vision. Simply position a document under the HD camera and listen along as the text is read out via the built-in speaker, or through headphones. You can connect the reader to a monitor or TV to view the text in your preferred size and high contrast colour option too. More than 20 languages available with high-quality, natural male or female voices. Easily scan, save, and recall images and import or export documents through the USB port.

Children's braille books

Enjoy reading together with our shared reading books which combine print, images and braille to capture every reader's imagination.

Shared reading books

Check out our delightful collection of shared reading books for pre-school or primary children and read them over and over again! Adapted to include Unified English Braille (UEB) on either interleaved clear sheets or clear self-adhesive labels, allowing the print text and images to be seen underneath and the book to be enjoyed by everyone.

Titles change regularly and prices start from £5.99.

Visit shop.rnib.org.uk/reading/books

DK Braille Books

We worked with leading publisher Dorling Kindersley to create the DK Braille collection of shared reading books for children of pre-school age through to 12 years old. They contain braille, clear print and colourful tactile images, making them inclusive as well as educational and fun.

Prices start from £9.99.

Reading aids

Check out the learning section of our Online Shop for aids to support reading and writing, both print and braille.

DW48

Typoscopes – reading guides

Mixed pack of four black plastic reading guides with a cut-out section to reduce the amount of visible text and to reduce glare, making it easier to focus on one line. Choose the size that fits your reading material, from large print books to paperbacks, and from newspapers and magazine articles to large print columns.

DW48 **£4.50** **£5.40**

Bookaroo

This beanbag reading rest will hold your book, phone or tablet at the exact angle you want on your knee, floor or desk. Made from the softest leather-effect PU and available in three funky colours, it's perfect for readers of all ages. There's even a little zipped pocket with a microfibre lining – use the lining to clean your screen and the pocket to store charging cables.

Board games

Make the most of sunny afternoons in the garden or grey days stuck inside with our tactile and large print games. We've got word games and strategy games, not to mention tactile dice and dominoes.

Mow access braille game

The aim of this udderly moovelous game is to create a herd using the delightfully illustrated tactile cow tiles, while avoiding getting too many flies (each cow tile has between zero and five flies on it) – the more flies you collect, the lower your total score. At the end of each round, each player takes numbered tokens to keep track of their flies. Tokens have high-contrast numbers printed on them and are in different shapes and sizes for anyone playing by touch. The game ends when someone collects 100 flies. The person with the fewest flies wins.

Two to five players

Age: 7+

Tactile magnetic Ludo

Race your pawns around the board to get them all home before your opponents. Board and coloured counters are tactile and magnetic. One tactile dice supplied. In addition to clear tactile markings for each starting circle, the track, home straight and home triangles, each track square has a braille number. Colours are represented by a tactile symbol on board and counters, for example, a cross for green and a dot for red.

Two to four players

Age: 6+

GB117 £26.00 £31.20

◆ New

Quarto Access tactile game

Test your strategy skills with this accessible and inclusive version of Quarto. Quarto Access is played by touch and memory and the aim of the game is to be the first player to create a line of four pieces with at least one common characteristic: round or square, short or tall, hollow or solid, grooved or smooth. The twist is that your opponent chooses which piece you must play! The tactile pieces are placed on the wooden board, which has a four-by-four grid, and are held in position by magnets. The game is supplied with two blindfolds to create a level playing field for sighted and non-sighted players.

GB92

Scrabble

Mattel's bestselling word game! The board has large squares with pegs at each corner, so the tiles sit securely in place. On your turn, easily rotate the board to face you using the built-in stand. Each plastic tile measures 2.4cm square and the bold black letters are in 16 point. The tiles in the braille edition have clear braille labels, so the large print can still be read underneath, and the board has tactile markings on the premium squares.

Blind football

Dave Clarke,
RNIB Chief
Operating
Officer

Please note, balls will need inflating;
pump and valve adaptors are not supplied.

Dave Clarke edition footballs

Our Dave Clarke edition footballs are inspired by the three-times Paralympian who is also England's highest-ever goal scorer with 128 goals. These special edition balls are RNIB-branded and printed with Dave Clarke's signature.

Blind football

Our audible footballs are perfect whether you're on the pitch or in your back garden using jumpers for goalposts. Go ahead and bend it like Beckham (but don't damage the delphiniums!).

GS28U

Blue Flame blind football

This size three rattling football is ideal for either indoor or outdoor play and is internationally approved for five-a-side/football for the blind (B1) competition games. This hand-stitched, inflatable football is made from textured first-class PU material. It is white with blue flashes running over it.

It has six rattling metal sound devices under the pentagon panels, for excellent sound and balance, and reduced bounce, according to International Blind Sports Federation (IBSA) specifications.

£37.50 **£45.00**

GS28U Standard edition

GS28DC Dave Clarke edition ■ While stocks last

GS29R

Rainbow five-a-side blind football

This colourful size three football is hand-stitched from imitation leather with a glossy surface and produces a loud rattling sound so it can be located easily in play.

This blind football meets the weights and measures standards laid out by the International Blind Sports Federation (IBSA), but it is not approved for IBSA-sanctioned competitions. This white football has reduced bounce and colourful flashes of green, orange, yellow, red, blue and purple running over it.

It is suitable for indoor and outdoor play. Six large sound devices under the hexagonal panels produce an excellent rattling sound.

£37.50 **£45.00**

GS29R Standard edition

GS29DC Dave Clarke edition ■ While stocks last

GS37R

Rattle ball – soccer, size 5

This size five multi-purpose rattling soccer ball is great for either indoor or outdoor games of five-a-side and football, and for various ball games, training and play.

Made from strong imitation leather, this ball is lighter and larger than IBSA-approved balls for blind football, and it also bounces more.

This white ball with purple decoration is recommended for players who prefer a lively and fun ball with a good bounce. Three sound devices produce a good rattling sound.

GS37R **£29.99** **£35.99**

GS39

Apricot blind football

This strong audible football is ideal for beginners or casual players who don't want to break the bank for a kickabout. Suitable for indoor or outdoor games, this size three football is made of red PVC with blue markings and has four rattling devices which make the ball easy to locate in play.

GS39 **£27.00** **£32.40** ◆ New

Blind football start-up kit

This start-up kit contains everything you need to get started with the popular Paralympic sport of blind football (also known as five-a-side football). You get one size 3 audible football, plus eight polyester blindfolds (four red, four black), all packed in a drawstring cotton bag.

The bright yellow football is of official size and weight and contains rattling devices so that it can be easily located in play. It is hand-stitched from finest PU, with a glossy surface.

GS33 **£37.50** **£45.00**

Foam and sensory balls

The road to Wembley starts here... Ignite a love of sport in small children by playing simple games with these audible foam and rubber balls and maybe one day, like Dave Clarke, they'll be wearing three lions (or a dragon, red devil, or an artillery cannon) on their shirt!

GS300

Petito foam sound ball

This little ball is soft, spongy and friendly to use! Made with PU panels, filled with acrylic wool and equipped with three sound devices to make it easy to locate.

This multi-purpose ball is easy to throw, roll, grab and hold, and has a pleasant rattling sound. It can be used for numerous activities and is an especially good choice for small children and seniors.

Primarily intended for indoor use, however, this ball can be used outdoors in dry weather.

£18.00 **£21.60**

GS300 Standard edition

GS19

Skinned foam bell ball

These hard foam balls are ideal for use by beginners in the fast-growing sport of Goalball, and for catching and throwing games. Each contains three metal bells so they can be located when in play.

GS18
Yellow, 15cm diameter

£18.00

GS19
Orange, 20cm diameter

£20.00

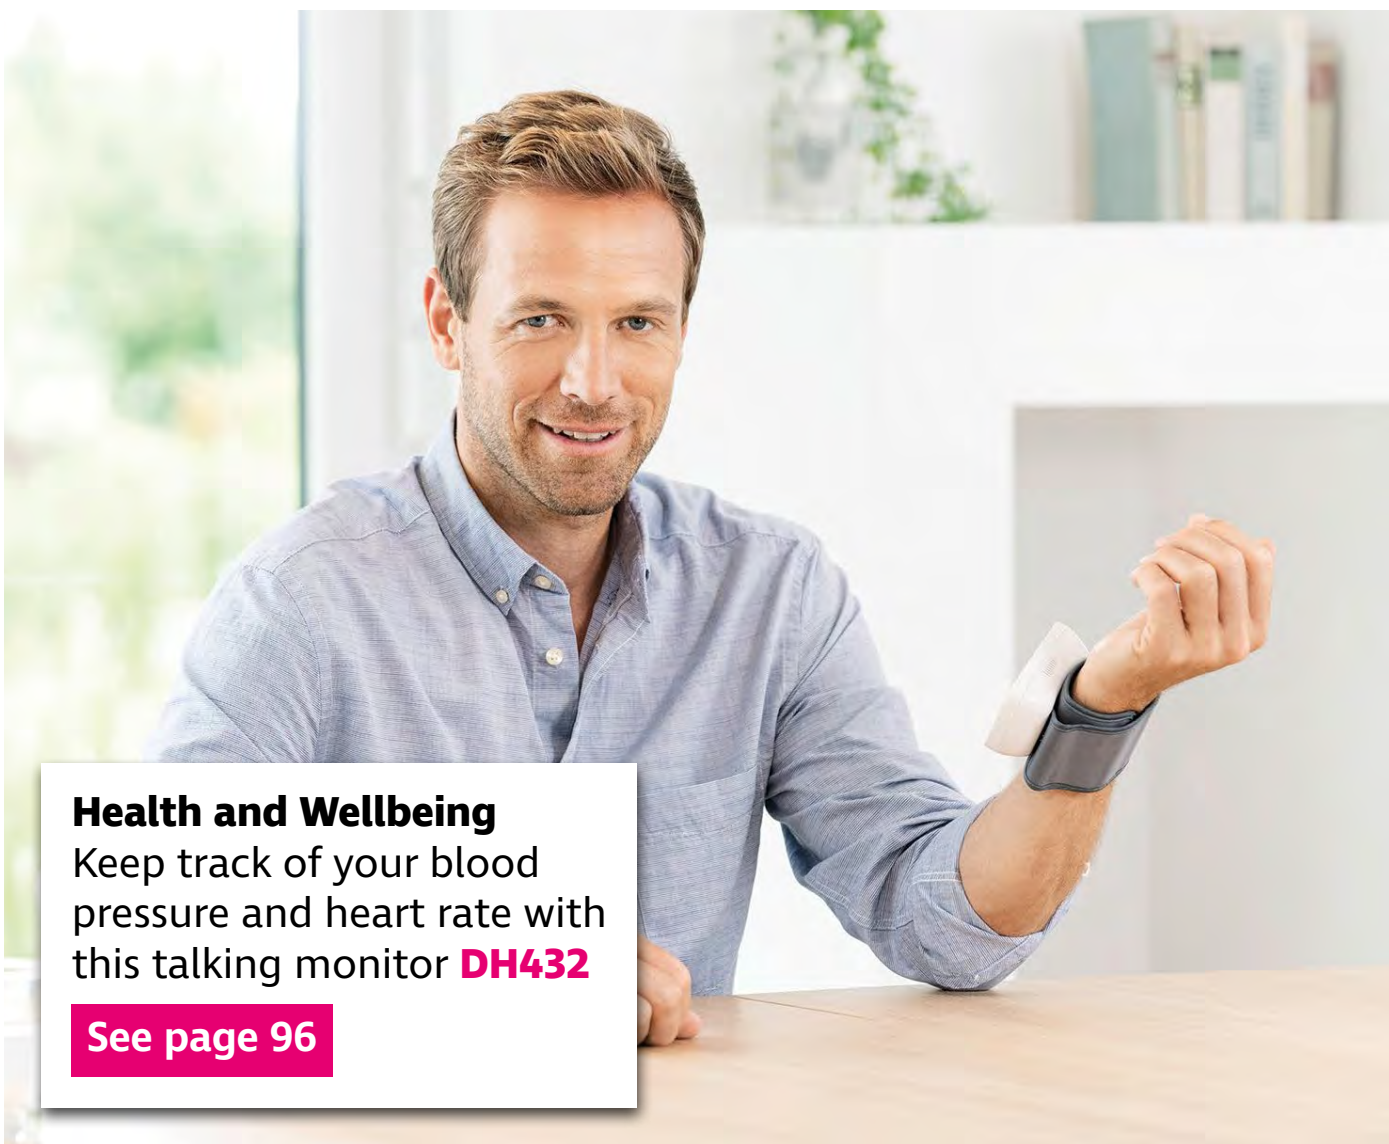

Butterfly bell ball

This bright and colourful size five rubber bell ball has a charming pattern of birds, flowers and butterflies on its surface, and makes a pleasant jingling sound so it can be easily located. Soft, light and flexible, it's ideal for multiple kinds of indoor play and sports and can also be used for play in swimming pools. It should not be used on rough surfaces outdoors. Please note, ball will need inflating; hand/foot pump and needle valve adaptor not supplied.

GS38 £18.00 £21.60

Other sports

Anyone for tennis? Or cricket? Or basketball, goalball or rugby, for that matter? If you want to play ball, we have the spherical objects that you need...

Please note, balls will need inflating; pump and valve adaptors are not supplied.

Activity kit for blind sports

This kit contains the essential items to get active and try out a new sport: eight good quality audible balls of varying size, with rattling or jingling sounds; eight polyester masks; five running tethers; six blind sports glasses; inspirational folder containing suggested activities and instructions; and a ball pump and handy container.

The eight balls included consist of: two small foam balls with bells, a spongy foam ball with rattling sound, a size one ball with rattling sound, a lightweight size four ball with rattling sound, a soccer bell ball (size five), a basketball (size seven), and a football of official standards.

GS34 **£239.99** **£287.99**

GS35R and GS35U

Justa Blind sports mask

This eyeshade is used for goalball, football and other blind sports – it shuts out all light and sight to ensure fair play. Made of soft black moulded rubber and pure light-resistant PU foam to ensure a close and comfortable fit, this one-size mask has an adjustable elastic strap.

The flexible mask wraps around your head, offering some protection to upper cheekbones and the nose root. All edges are rounded, so that other players will not get hurt by the mask.

£29.99 **£35.99**

GS35R Red elastic strap

GS35U Blue elastic strap

GS31-2

Blind tennis balls

Pack of audible yellow foam tennis balls – suitable for other throwing games too. These balls are made of strong yellow foam, and each have a jingling ball inside to make them easy to locate during play. These balls withstand cleaning with rubbing alcohol.

GS31-2 Pack of two balls **£22.50** **£27.00**

GS32RE

Basketball with bells, size seven

This high-quality size seven audible basketball is made from orange rubber and contains two bells which make a clear jingling sound so it can be located easily when in play.

It can be used for all sorts of throwing games and is suitable for use in swimming pools or at the beach.

The ball is also suitable for goalball training for children if the ball is inflated so that it is still a bit soft and easy to control. Some goalball players even use the basketball for training their throwing technique at home.

Home

Whether you want to be named Star Baker or simply make a cup of tea with confidence, our accessible kitchen range is here to help. We've got gadgets for measuring ingredients, checking temperature, preparing food, and opening containers.

Time for a cuppa!

We've been helping people with sight loss get their morning cuppa for more than 25 years with tried and tested gadgets like our Liquid Level Indicator. Get ready to dunk your biscuits...

RNIB Liquid Level Indicator

Want to know when your cup is full? Place this helpful gadget on the side of your cup; a series of beeps or vibrations indicate when you can add milk, and another quicker alert follows when the cup is nearly full. Lightweight and suitable for use on most cups, there are also two magnets on the back, allowing easy storage on your fridge. The easy-open battery drawer makes changing batteries simple, and a beep confirms they are fitted correctly. A damp cloth can be used to clean the probes, but the unit should not be immersed in liquid.

Warning: Do not leave mirrors in direct sunlight or allow sun rays to strike the curved magnifying surface of the mirror. This may cause a concentration of heat capable of causing a fire and/or damage.

Why lighting is important

Everyone needs good levels of light, and these needs increase as we get older. As your eyes age, less light reaches the retina at the back of your eyes, which transmits information to your brain. Most people aged 60 need three times more light than when they were 20.

Enhanced lighting can be extremely beneficial to people experiencing sight loss, but some eye conditions can result in glare problems even in normal light levels, which can be uncomfortable or even intolerable.

Lighting hints and tips

- Increase contrast by using specific lighting in the right area: a task light in the kitchen can brighten up a work surface, and quick start-up energy-saving lights are a great idea in the hall, stairs and landing.
- Avoid shadows in key areas by ensuring brightness levels are similar as you move through the house.
- Use light-coloured lampshades, keep windows clean and use bright surfaces to reflect as much natural light as possible.
- Use battery-powered LED (light-emitting diode) lights in areas where trailing wires may prove hazardous.
- Use a combination of wall, table and floor lights to give an even spread of light rather than relying on one central light.
- Ensure you are never closer than 30cm (1ft) to any bulb and make sure task lighting is below your eye level, keeping it close to the task to avoid shadows.
- The amount of illumination on an object increases fourfold if the distance between the lamp and the object is halved. Remember to keep some background lighting on as well as it will help prevent eye strain.

Visit [rnib.org.uk/lighting](https://www.rnib.org.uk/lighting) to download our lighting factsheet, which explains specifications such as Kelvins, lux and lumens, to help you choose the right lighting products.

Popular and portable

Given their flexibility, it's no surprise that some of our bestselling lights are portable ones.

DH431

Adel portable light detector with keychain

Never be in the dark about lighting – this small, easy-to-use light detector comes on a keychain so you can have it to hand anytime you want to check a light source.

This small, portable device detects light intensity and produces an audible tone which varies according to brightness and contrast.

- Emergency mode: 15 lumens
- Nightlight mode: 0.3 lumens (40 lumens when sensor activates)

Desk lights

Whatever the task – studying, organising household bills, doing a puzzle, or enjoying a book – direct some extra light on it with a desk light.

Daylight UnoLamp and DuoLamp table

These contemporary lamps produce a high light output over a large area, or more concentrated light for specific tasks. Both lamps have a flexible arm for angling the light to suit your needs.

While the Unolamp has a single lamp head, the Duolamp has two slim, independent lamp heads which can be moved separately to either sit parallel to each other, or can form a straight bar or a V-shape. Each lamp head has an easy-to-locate touch dimmer allowing you to choose from four levels of brightness.

DH420 UnoLamp **£40.50**

- 2,090 lux at 30cm
- 6,000k (daylight white)

Don't be SAD

Banish the winter blues with these lightweight and portable lamps that switch easily between light therapy mode and task lamp mode.

If you suffer from SAD (Seasonal Affective Disorder) there are a number of things you can do to help improve your SAD symptoms, like trying to get as much natural sunlight as possible. If this is not possible, you can use a SAD therapy lamp.

Some people with SAD find that light therapy can help improve their mood considerably. SAD therapy lamps like the Daylight TwoSun and TriSun produce a very bright light. This light simulates the sunlight that's missing during the darker winter months.

It's thought the light may improve SAD by encouraging your brain to reduce the production of melatonin (a hormone that makes you sleepy) and increase the production of serotonin (a hormone that affects your mood).

To use these lights as SAD lights, simply unfold the light to its full extent and position it to your side at arm's length, with the shade – at full brightness – directed towards you. Do not stare into the light, it is sufficient that the light reaches your eyes indirectly. In light therapy mode, the lamp will automatically shut off after 30 minutes.

These lights have been tested to Medical Safety Standard EN/IEC 60601-1.

DH476

Daylight TwoSun SAD and desk lamp

When you're not using the TwoSun as a SAD light, you can use it as a standard desk lamp. This two-in-one lamp has been ergonomically designed to be easy to carry with one hand and folds up compactly when not in use. The Easy Twist Shade allows the light to be positioned and directed exactly where you need it while the brightness of the daylight LEDs can be adjusted using the tactile three-step dimmer button. The high quality LEDs and CRI of over 95 provide optimum light therapy and ensures accurate colour.

DH476 £100.00 ◆ New

Lighting details

- LED light
- 10,000 lux at 10cm; 5,000 at 20cm; 2,500 at 30cm

DH477

Daylight TriSun SAD and desk lamp

The Daylight TriSun has a CRI (Colour Rendering Index) of over 95 and a large 16.5cm diameter shade, so you can be sure of an exceptional light quality and shadow-free, evenly diffused light.

Choose from Daylight, Cool light and Warm light in both the light therapy and desk mode. This highly functional lamp can be customised to your needs; simply adjust the brightness level to your liking using the dimmer switch, move the arm and shade into the perfect position, and charge your phone.

DH477 £120.00 ◆ New

Floor-standing lights

Floor lights provide background lighting that helps to relieve eye strain, direct light over your favourite chair, or simply add more light in any room to brighten up the space.

RNIB Lumina Plus floor lamp

This sturdy floor lamp has a modern minimalist design, an anti-trip cable holder, and can be operated by remote control or by the tactile control panel on the lamp pole. It has a long, flexible goose neck that lets you direct light exactly where you want it, whether that's on to your book, your child's homework, or a wider area. Daylight-equivalent white light makes this light ideal for colour-matching.

With five different colour temperature settings, five brightness levels and an optional slider to focus the light, you can adjust the Lumina Plus for exactly the lighting you need. You can use the remote to set a timer, so the light will turn off automatically after one minute or 10 minutes. The remote also activates the night light feature, which produces a soft glow around the edge of the lamp head.

Exclusive to RNIB, this lamp was developed by Native Lighting to incorporate feedback from partially sighted product testers.

Please note: Sighted assistance may be required to assemble the lamp.

DH442 **£108.50** **£130.20**

Daylight MAGnificent Pro magnifying lamp

Do more of what you love with the Daylight MAGnificent Pro magnifying lamp. Use it as floor lamp or table lamp – with or without the magnifying lens. It's ideal for all types of detailed work – reading, crafting, jigsaws, art and more. The 13cm, 1.75x, semi-rimless magnifying lens gives you a clear view of your work, and the magnetically attached cover transforms the magnifier into an elegant task lamp.

Energy-saving daylight LEDs provide high contrast and accurate colour matching, making it easier and less tiring to read, work and see detail clearly. Adjust brightness easily at the press of a single button – choose from three levels to suit your needs.

Change the height setting, depending on whether you need a floor or table lamp, and adjust the flexible arm and Easy Twist head to direct the light exactly where you need it. Please note that sighted assistance may be required to assemble the lamp and adjust its height.

HD13

RNIB DAB radio

This simple radio has been designed for people with low vision. Its extra-large display features high-contrast characters in white on black and in both upper and lower-case letters to make them easier to read.

The radio's controls and buttons are tactile and easy-to-use, giving audible confirmation when pressed. The buttons for initial set-up and recording memos (for example, reminders to take medicines or for appointments) are concealed beneath a flap when not in use. This radio also offers voice prompts which can talk you through features such as tuning or recording memos.

The main controls are black and easy to see against the radio's white upper casing. The large volume and tuning controls are clearly marked with bold black text, and can be identified by touch (one is concave, the other convex). Please note, the radio will not speak the station name as this feature is not currently compatible with digital radios. The radio also has a temperature display with Low Room Temperature Alert option, dual alarm with Snooze function, a sleep timer and the option to pre-set three FM and three DAB stations as favourites.

The radio is tuned for the spoken word, but you can adjust the equaliser options to suit what you're listening to, for example: jazz, classical, pop or rock. This radio has two 3W RMS stereo speakers and a headphone socket.

HD13 **£85.00** **£102.00**

Talking watches

Our talking watches can tell you the time at the press of a button, no matter where you are.

RNIB talking watch

These high-quality talking watches announce the time in a natural voice: press one of the two easy-to-feel buttons or activate the touch glass. You can use fingers, or, if you have one hand occupied – for example, with a cane or guide dog – your cheek to activate the voice.

The hands and voice on these watches automatically synchronise to the internal time set, so there is no need to manually set them, or to rely on someone else to help you. A spoken menu guides you if you need to set the time or date, or an alarm. The volume is also adjustable.

Available in two sizes and a range of colour options. The watches have a white face with bold, contrasting black buttons and hands. The large watch fits wrists 160-210mm (157-170mm for the expanding strap); the small watch fits wrists 140-190mm (147-160mm for the expanding strap).

Eyeshields

Whether indoors or outside, eyeshields can help relieve eye strain, reduce glare and enhance contrast.

Why wear eyeshields?

Eyeshields protect your eyes and can help increase contrast and definition. They're light and easy to wear, and some styles can be worn over your existing prescription glasses. They can be worn inside and outdoors, under fluorescent lighting, out in the sunshine, or on an overcast day – whether you're shopping, working at a computer, or enjoying your hobbies.

Please note: that most eyeshields are not suitable for use while driving.

Eyeshields are designed to exclude harmful ultraviolet (UV) and blue light, which can damage the retina. Please check the blue light and UV protection provided by your selected product. It is not possible to predict which colour filter will be best for your eye condition, you should try different colours in the environment where you get glare symptoms to find the best one for you. If you need more help, please contact your optician or low vision specialist.

Why MediView eyeshields?

The MediView range incorporates five HiView™ filters, each designed to help make a significant difference to your everyday life. Each filter has different properties, purposefully created to minimise glare, enhance contrast, and improve adaptation when moving from sun to shade, while also helping to enhance protection to the internal structure of the eye.

There is also a choice of well-designed, comfortable and protective frames, intended to enhance the benefits of the MediView HiView™ range. The percentage shows the amount of light absorbed by the filter.

The MediView HiView™ filter range

HiView™ Lite is a yellow filter that provides blue light absorption for reduced glare, UV protection and a high contrast filter for improved definition. For indoor use and low intensity sun (26 per cent absorption).

HiView™ Midi is an orange filter that provides 100 per cent blue light absorption for reduced glare, UV protection and a high contrast filter designed for improved definition. For indoor use and low intensity sun (53 per cent absorption).

HiView™ Extra is an amber filter that provides 100 per cent blue light absorption for reduced glare, UV protection and a high contrast filter designed for improved definition. For general outdoor use and sunlight (81 per cent absorption).

HiView™ Plus is a green filter that provides blue and red light absorption for reduced glare and UV protection. Designed is for general outdoor use and sunlight (81 per cent absorption).

HiView™ Neutral is a grey filter that provides UV protection. Neutral is for those who do not want their colour vision to be affected by the filter colour. Designed for general outdoor use and sunlight (68 per cent absorption).

Get out and about with our mobility products, including canes of all types, and devices to help guide you.

Ambutech symbol cane

Increase your confidence when you're out and about with a symbol cane to indicate to other people that you have sight and/or hearing loss. These reflective, lightweight aluminium canes fold into either three or four sections, ideal for putting into your bag when not in use. Please note, symbol canes are not to be used as walking sticks or support aids.

£17.50	£21.00
MS20	70cm, three-section
MS22	85cm, four-section
MS23	100cm, four-section
MS25	105cm, four-section

Red and white banded symbol canes which highlight both hearing and sight loss are also available.

Stationery

See page 117

MS44

Ambutech telescopic symbol cane

This white fibreglass five-section symbol cane has a compact telescopic design and can be discreetly tucked away in a pocket or bag when not in use. Use this cane to indicate to other people that you have sight loss. Please note, symbol canes are not to be used as walking sticks or support aids.

Measuring approximately 75cm when fully extended, it shrinks to 19.5cm when not in use. When collapsed this cane has one section with two small caps at each end joined by elastic. It has no handle grip and a black ID tip. Weight: 44g.

MS44 £22.50 £27.00

Ambutech graphite no-jab long cane

This revolutionary shock-absorbing long cane is designed to eliminate the sharp jabs that can occur when cane tips get stuck while you're out and about. When the cane strikes a solid object, the handle gently recoils approximately five inches, absorbing about 80 per cent of the shock – eliminating the sharp jab or gouge to your wrist or abdomen, but without taking away from the sensitivity of the cane.

Supplied with a hook-style roller marshmallow tip **MP26**

StellarTrek

The StellarTrek is a digital orientation and mobility assistant, but not as we know it, Jim...

Using state-of-the-art GPS technology and a user-friendly tactile interface with buttons, the StellarTrek can guide you along your chosen route using appropriate voice commands. So you can lay in a course for your favourite coffee shop, most convenient bus stop or somewhere completely new to you, and the StellarTrek will 'make it so'.

The StellarTrek uses an integrated optical sensor and artificial intelligence to locate and recognise street addresses, doors and entrances, and provides audio and voice guidance to the last 40 feet of your destination.

It also recognises and reads aloud text, such as street or entrance signs, ingredient lists, receipts, or nutritional values on food labels. Its cameras offer text recognition capability in 14 languages.

All-day battery life and advanced features make a world of possibilities available, independently and safely, so that, whatever today's mission, you can boldly go where you need to.

Labelling

and

voice

recorders

Voice recorders

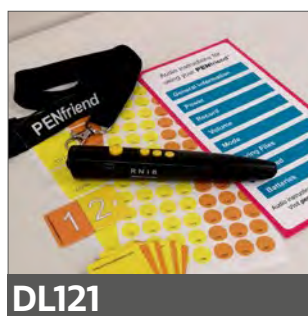

Voice recorders can help you label objects in your home, school or workplace, or record shopping lists and other messages so that you never forget an ingredient again!

RNIB PenFriend 3 audio labeller

Our easy-to-use labelling device lets you record your own voice on to sticky labels which you can attach to a wide range of items, such as spice jars, your CD or vinyl collection, clothing and beauty products or even plant seed packets. Simply touch the PenFriend to the label to hear your recording back and make easy identification possible.

PenFriend labels are available in various forms, including stickers, and laundry labels. To save on the number of labels you use, cut them into pieces when you have multiples of one item. Laundry labels are useful for identifying clothes, bed linen sizes and more.

Each PenFriend can store up to 500 hours of recording and works as an MP3 music player or Talking Book player. Your recordings can all be backed up with our Label Manager software.

DL121

DL128 **£87.00** **£104.40** ★ Bestseller

In the box

DH341

Multi-memo voice recorder

This handy circular voice recorder records and plays back messages, with a total recording capacity of six minutes which can be split over 60 messages.

Record and play them back one at a time using the skip forward and backward buttons. Delete individual messages or use the locking switch on the back to protect any messages from being accidentally erased.

This recorder is ideal for creating shopping lists and important reminders, or for taking note of phone numbers and appointments. Measures 8cm in diameter.

DH341 £19.80

In the box

- Three LR44 batteries

DH451

Talking heart voice recorder

Send a heartfelt message, record your shopping list or create audio labels with this purple, heart-shaped audio message player. It holds up to two minutes of audio – ideal for a short message, a reminder, or labelling. Recording and playing back your messages is easy, and you can either save the message forever or rerecord a new one whenever you like.

Sighted assistance may be required. Not suitable for children under three.

DH451 £16.20 ■ While stocks last

Additional items to buy

- **BAT03** Three AAA batteries

VR19

Olympus DM-770 digital voice recorder

Create stereo recordings with the help of voice guidance to navigate the recorder's menus. This recorder also has distinctive button contours, making them easier to identify. The recorder connects easily to a PC via integrated USB, and its 8GB of internal memory allows more than 2,000 hours of recording. It has three microphones which give it the ability to focus on one sound in a noisy environment or to "zoom" in for a focused recording in a large room. Choose from six environment options, including lecture, conference and dictation, to get the best sound.

VR19 £149.99

Magnification

Electronic magnifiers

Magnify images and documents on a screen with an electronic magnifier (also known as CCTVs or video magnifiers).

Portable electronic magnifiers

Portable magnifiers are ideal for taking out and about to read food labels, menus or bus timetables as they have built-in rechargeable batteries and, unless otherwise stated, a two-year warranty.

Ruby handheld video magnifier

This pocket-sized video magnifier is small and lightweight and provides the magnification you need to read information at home or out and about. With the handle closed, the Ruby can be placed directly on to a document and set to magnify at 5×, 7.5×, 10×. With the handle extended, the device offers 2× to 14× magnification.

The image on the 4.3-inch screen stays crisp and clear, even when rapidly moving the magnifier across lines of text. View in full colour, black on white, white on black, yellow on blue or yellow on black. The image capture feature means you can freeze an image at arm's length and then bring the screen closer to read. Save up to 15 images for future reference.

Can be used with standard AAA batteries, or the supplied rechargeable batteries. Battery life: two hours

HC55 £250.00 £300.00

HC131HDS

Compact 10 HD video magnifier

With its large 10-inch touchscreen, customisable features and intuitive operation, the Compact 10 HD offers all the benefits of a desktop video magnifier, but in a much smaller, foldable, and portable design. It offers zoom magnification from 0.5× to 22×.

The magnifier is easy to use and has a unique swing-out arm which effortlessly captures full-page documents and reads them to you. A tactile indicator at the foot of the device tells you exactly where to place the document you want to read.

With the arm unfolded, you can also easily look at photos, view medicine packaging, and read tinned food labels, without being restricted in your movements. The arm even allows you to write your signature and complete crossword puzzles.

Switch easily between Easy and Advanced Mode. Use Easy Mode for increased ease-of-use: contrast and magnification only. Advanced Mode gives additional functions, including a menu, a clock, and extra options.

Available with or without speech function.

Visolux digital XL FHD 12

The Visolux is an advanced portable video magnifier that features a 12-inch sharp, non-reflective TFT LCD display with touch screen interface and speech output on all menu options. The full high-definition camera provides 2× to 22× magnification either in steps or as continuous zoom.

The device's unique Dynamic Line Scrolling feature allows you to scroll both horizontally and vertically when on higher magnification levels, without having to move the device.

Images can be captured and stored on a removable 8GB SD card, and, using the HDMI and USB ports, you can save images to your computer or live stream to a television screen. You can also connect a video camera so the image from the camera appears on the Visolux's screen. Includes a built-in stand and LED illumination.

MAG68

MAG77

Eschenbach mobilux LED hand magnifier

The Eschenbach mobilux provides exceptional magnification and outstanding illumination. Ideal for reading timetables, menus, and small print on packaging. Its energy-saving LEDs can be used when needed, even when the batteries are getting low, and its lens has a scratch-resistant coating.

To soften the colour of the light, filters are included with each magnifier which can be fitted to provide three different illumination options. Kelvins are 6,600k on the clear filter, 4,500k using the yellow filter and 2,700k with orange.

MAG66	3.5× 10D Rectangular	£63.50	£76.20
MAG93	4× 16D Rectangular	£60.00	£72.00
MAG68	5× 20D Circular	£63.50	£76.20
MAG77	6× 4D Circular	£67.00	£80.40

In the box

- **BAT01** Two AA batteries
- Protective case
- Three colour filters

Optima Ideal hand magnifier

This handheld magnifier has a clear plastic frame and grey plastic handle. Ideal for spot-reading recipes, letters, and ingredients or nutritional information on food packaging.

MAG04 3× 8D Circular **£12.25** **£14.70**

MAG05 4× 2D Circular **£10.75** **£12.90**

Okolux Mobil Plus LED hand magnifier 5×

This handheld magnifier has a built-in daylight LED light for when you need additional lighting to read newspapers, menus, recipes or food packaging. The round plastic aspheric lens is 5.5cm in diameter and provides 5× magnification.

MAG19 **£60.00** **£72.00** ★ Bestseller

In the box

- **BAT03** Three AAA batteries
- Soft protective pouch

For magnifiers with 7× magnification or stronger, we strongly recommend a low vision assessment before purchase. Our full range of magnifiers, including these higher magnification lenses, can be found at rnib.org.uk/shop.

Bar and dome magnifiers

These magnifiers sit on the page to make magnifying easy. Bar magnifiers magnify one line of print at a time, making it easier to trace a single line of text.

Optima bar magnifier

This high-quality 2× bar magnifier sits on the page to magnify one line of print at a time, making it easier to trace a single line of text. The magnifier is ideal for people with relatively good vision when reading directories or other reference material containing columns or lists of information in very small print.

MAG90 £17.25 £20.70

Optima dome magnifier

This dome-shaped magnifier sits on the page, so the text is always in focus as you slide it across the paper. It is a low-powered magnifier (1.8× magnification) but very easy to use.

MAG82 £35.00 £42.00

Accessible computers

Our accessible computer range allows you to confidently access and send emails, chat with friends or relatives, catch up with the news and much more. Your computer will arrive set up and ready to go with your choice of either GuideConnect, or SuperNova, software. You'll get an hour's free training over the phone, as well as access to the UK-based support team, by telephone or remote access, and a 30-day money back guarantee.

GuideConnect software

This software provides a consistent and easy way to use the features of a computer without having to learn lots of different software. Its simple talking menus help even total beginners to send their first email, browse the web and much more. Relax and let the natural speech and high contrast, large print text lead you, step-by-step, to computer success. You can even use it on your TV if you prefer.

SuperNova software

This software offers crystal-clear magnification combined with the option of speech to hear characters and words read aloud as you type. Ideal for people with partial or deteriorating sight, the text magnifies from 1.2× to 64× and you can easily change the screen colours to suit your needs. Touch screen compatibility means you can have instant magnification of your point of interest, as you need it.

Desktop computers are supplied with a touch screen, mouse, keyboard with quick access keys, DVD drive, Windows 10 and Microsoft Office Home and Student Edition. Laptops are supplied with an integrated webcam, Windows 10 and DVD drive.

Phones

Landline telephones

Please check our website for new telephone models. Landline features include large buttons with bold contrasting numbers, and big memory buttons for speed dialling. Our cordless phones have DECT technology for clearer digital sound.

BT Big Button 200 corded phone

This easy-to-use phone gives you the option of using the corded handset or the hands-free, loudspeaker option to make incoming and outgoing calls. It features speech amplification and is fitted with an inductive coupler, so it is compatible with hearing aids. The additional "loud" button also boosts the caller's voice by up to 16dB. The phone has three standard ringtones, adjustable ringer volume control, and a visual ring indicator.

The large black number pad buttons have great contrast against the white phone casing and white text; they are well-spaced, and each button measures 2cm high.

The phone features three one-touch memory buttons to easily dial your most important numbers, and you can store an additional 10 numbers in your quick dial memory.

Mobile phones and tablets

Our phones and tablets are unlocked so you can use a SIM card from your preferred network provider. SIM cards are not included.

BlindShell Classic 2

This accessible mobile phone is easy to use and has some smartphone functionality. It has large, tactile buttons on the keypad, and offers voice control. Its specially designed hardware includes an improved loudspeaker, long-life battery and a 13MP camera.

Features include WhatsApp, YouTube, an internet browser, built-in screen reader, a colour detector, and NFC object tagging. You can also add more apps if you need them.

Other assistive tools include a magnifier, GPS location, and an SOS button. You can also program single button access to your favourite apps and add NFC tags to items to help you identify them with your phone – for example, distinguish between toothpaste and hand cream.

BlindShell Classic 2 also offers you a book reader, games, email, FM and internet radio, a music player and a voice recorder.

Emporia TALKactive mobile phone

Developed with advice from RNIB's Technology for Life Team, this elegant clamshell feature phone has a Voice Assist feature to make it easy to stay in touch via phone calls and messages.

Voice Assist announces all the key functions, from menus and incoming numbers to phone book contacts. It also means that with one button press you know your battery level and the time of day. New messages are announced as they arrive and read out when you choose to listen.

When you want to reply, the phone will read back the keys as you input text and read back the finished message before you send it.

Designed with simplicity in mind, the Emporia TALKactive T221 4G also has a clear 2.2-inch screen, large text and excellent contrast both on the display and the backlit keypad.

The Emporia Emergency Call Function provides added security in the event of difficulty, and the phone has two Direct Memory buttons for your most used numbers.

This phone requires a Nano-SIM card.

HM87-U £125.00 £150.00

In the box

- Charging cradle and cable
- Two battery covers

Emporia V27 Simplicity mobile phone

Designed to be uncomplicated, the Emporia Simplicity V27 is a 2G mobile bar phone with accessible features.

The large two-inch screen displays text that is large, bold and adjustable. Both the display and backlit keypad use high contrast white text against black to make them easier to see. The start and end call buttons are clearly marked with green and red icons. The buttons are all extra-large, raised and illuminated, with an excellent pressure point for ease of dialling.

Three direct memory buttons allow you to quickly dial your most-used numbers, meaning help is never too far from reach.

Other features include emergency button, radio, alarm, calendar, calculator, and three alert profiles (silent/sleep, meeting/theatre, and maximum/bus mode). Sounds are also loud and clear, to help those who are hard of hearing.

On stand-by, the battery lasts up to 360 hours, and has a talk-time up to 300 minutes. Requires a mini-SIM card. This phone is a 2G-only model and not compatible with network Three.

Orbit Writer

Write braille anytime, anywhere using this ultra-compact Perkins-style braille keyboard that works with all smartphones and computers, straight out of the box. It gives you an instant, seamless connection so you can get on with sending messages and emails, updating your social media, and much more. High-quality scissor keys provide a smooth, quiet operation and positive tactile feedback. Navigation keys let you control your smartphone or computer with intuitive key combinations, so there's no need to use touch gestures. Connect to five devices simultaneously using Bluetooth and one over USB, and switch between them easily using hotkey combinations.

Lightweight and similar in size to a small smartphone, the keyboard also has a rugged construction. It will fit easily into a pocket or small bag, but also has attachment points for a strap or lanyard. Its fast-charging, long-life battery gives more than three days of use.
