

New

Product

Guide

July 2026

Editor: Joanna Franks

Welcome to this jam-packed July issue of **New Product Guide**.

We've got a lot to shout about, including Hable Speechlabels – a new way to record your own audio labels for groceries, laundry, medicines, CDs and more – exclusively available in the UK from RNIB!

We've also brought in the exciting IKONN range – common household devices that can be standalone products, but when used with the IKONN controller or the free, accessible app, announce measurements (weight, temperature, length, etc) in a clear voice or display them in extra large text on your smartphone or tablet.

And that's not all! We've added the Tonies range to our Shop

too... The Toniebox 2 is a soft but robust, button-free, screen-free audio player designed for children from 12 months and up. Children simply place one of the Tonie characters on top of the box to listen to stories and songs. The Tonie figures are visually and tactually distinct, making it easier for blind and partially sighted children to read independently.

We've also expanded our inclusive greetings card range, added new large print puzzles (including a Whodunit collection), and launched our new Big Print Academic Diary.

Until next time, happy shopping!

How to order from RNIB

Order online at
shop.rnib.org.uk

Call our Helpline on
0303 123 9999

Some of our products have been specially designed, this means that blind and partially sighted people, or anyone buying on their behalf, will not pay VAT on these products. These products are listed with two prices. If there is only one price, that is the price all customers pay and this will include VAT (unless it's a zero-rated VAT publication). VAT is 20 percent as of June 2026. We reserve the right to amend prices.

Products are returnable within 14 days of receipt in an 'as new' condition in original, undamaged packaging. This excludes bespoke products and software. Hygiene items cannot be returned unless unopened or faulty. We kindly ask our customers to ensure that any faulty products being returned are packaged securely for stable transit, or the warranty may be voided. Where possible, please use the original packaging.

Your Christmas gift guide issue of New Product Guide will be available, at no charge, on our Online Shop from 16 September.

This accessible QR code is a quick way to access our Shop on your smartphone or tablet. Simply point the camera at the code (which has a NaviLens border to make it easier to find) and select the link to the shop that appears once your device has identified the code. We hope it will make shopping with us a little bit easier!

Speechlabels – a new way to record your own audio labels

Designed for blind and partially sighted people, Speechlabels work with your smartphone to let you easily record, and playback, an audio label for your groceries, laundry, DVDs, toiletries, medication and more, so that you can quickly and clearly identify everyday items.

These simple NFC and QR code labels are fully accessible with the free Speechlabel app for iOS and Android and allow you to label items easily using your own voice.

There are two types of Speechlabel – NFC labels and QR code labels – both of which can be scanned by most smartphones with the free app (details of compatible Android and Apple devices are listed in the product specifications).

NFC stickers are scanned by tapping your phone against them – no camera aiming needed – allowing you to quickly and clearly identify everyday items.

Speechlabel's QR code stickers use Aztec code, which is especially designed for fast and reliable scanning and a camera only needs to capture about 10 percent of the code for it to work, making them perfect for quick, accurate scans. This makes them especially useful for blind and partially sighted users, since you don't need to perfectly align the sticker with the camera.

It's easy to record and play back your audio label using the accessible Speechlabel app – you can describe an item in brief ('ground cinnamon', 'Beatles, Help', or 'white shirt with fox pattern')

or add extra description, such as nutritional information, track listing, or care instructions, for example.

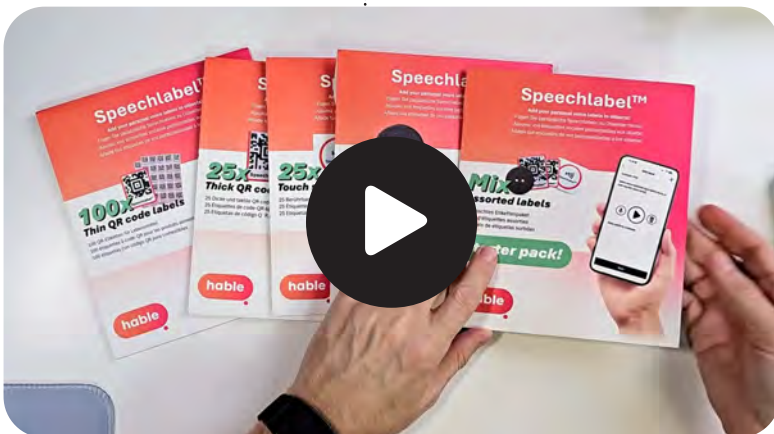

To use, simply download the free Speechlabel app on your phone and tap the phone to an NFC button or sticker to scan it, or use the smartphone camera to scan a QR code sticker. After scanning, you can record a voice message or type a short description. The next time you scan the same sticker, the app will play back or display your saved information. It's quick, easy, and designed to be fully accessible.

You can also choose to save your audio labels in the cloud and share them with other people.

The Speechlabel app can also scan barcodes which you can add your own audio labels to.

You can choose from four types of Speechlabel, or buy an assorted pack that includes all the different labels to find the ones that work best for you.

You can learn more about Speechlabels in this video review by The Blind Life: <https://www.youtube.com/watch?v=3qDyqgvFAKI>

Scan this accessible QR code with your smartphone or tablet to watch the video on YouTube.

Hable QR Code Sticker (Thin) Speechlabel – contains 100 labels

The thin QR code labels are made for groceries, but you can also stick these thin, easy-scan QR stickers on anything that doesn't need a very long-term label. These simple, fast, and flexible stickers are water-resistant, and measure 18 × 22.5mm, so they fit almost anywhere without getting in the way.

DH143

Hable QR Code Sticker (Thick) Speechlabel – contains 25 labels

These QR code labels are thicker (0.9mm deep) than the thin QR code labels, have a durable, glossy finish, and are resistant to wear, moisture, and fading. They stay put and scan effortlessly, even after years of use. Designed for long-term organisation, they measure 28 × 35mm, and have a strong adhesive to keep them in place.

DH144

Hable Touch Sticker Speechlabels (NFC) – contains 25 labels

These NFC stickers are moisture-resistant, 30mm wide, and a little thicker than a sheet of paper, so they fit almost anywhere without getting in the way, while you can still feel them for easy locating. Strong and long-lasting, they're great for simple, discreet, and reliable labelling of things you use often, like containers, CDs, or gadgets. Please note, NFC stickers don't work on metal surfaces, although most will continue to work in the freezer (apply to a dry surface, before putting the container in the freezer).

DH146

Hable Laundry Button Speechlabels (NFC) – contains 25 labels

The NFC laundry buttons are soft, flexible, and washable, so they stay in place even through regular wear and washing buttons (machine-wash safe and dryer-friendly up to 60°C / 140°F). Durable, discreet, and fully accessible, these 20mm diameter buttons are ideal for organising your wardrobe or helping someone identify clothing independently.

DH145

Hable Starter Pack – Assorted Speechlabels

The starter pack of assorted labels includes five NFC stickers, five NFC laundry buttons, 25 small QR code stickers for disposable items (such as groceries and medication packaging), and five thick QR code stickers for items you keep (DVDs, storage boxes, food containers).

DH141

IKONN – a new way to make household devices accessible

The user-friendly IKONN family of products has been specifically designed to be accessible to blind and partially sighted people and consists of common household devices that can connect to the IKONN Controller, or to a free app, so that their measurements can be heard via the controller or read in high contrast, extra-large type on a smartphone or tablet screen.

The kitchen scales, kitchen thermometer, bathroom scales, tape measure, indoor thermometer, forehead thermometer, callipers, and angle measure all have crystal clear digital screens and are easy to use. When paired with the IKONN controller or the free, accessible myIKONN app (which can be downloaded for iOS from the App Store, or for Android from Google Play) you can hear weight, temperature, length, size, angle, and humidity announced in a clear English voice, or read it in large print in one of eight high contrast colour settings. (A wide range of languages is available via the Controller or app.)

DH503

DH504

DH506

The IKONN Controller has standalone functions – time/date, timers, alarms, coin toss/dice roll for games, and voice notes – and adds some extra functionality to some of the household devices (for example, calculating your BMI when paired with the bathroom scales, or measuring different ingredients by volume on the kitchen scales).

It's easy to use with tactile buttons and an audio menu. A built-in voice guide can walk you through every feature step-by-step.

The IKONN Colour and Light Sensor only works when plugged into the IKONN Controller and can identify more than 20 colours and five shades from very dark to very light. It also features a light sensor for finding a window or detecting if a light has been left on, and has a solid/pattern mode to help you identify your favourite shirt, skirt, or duvet cover by breaking down the colours announced.

DY08

DY09

DY10

These modern, high quality products have been thoughtfully designed to be used by the whole family as well as to enhance accessibility and independence for blind and partially sighted people.

Encourage independent reading with Tonies

The Toniebox 2 is a soft but robust audio player designed for children from 12 months and up. Little ones simply place one of the Tonie characters on top of the box to listen to stories and songs.

There are hundreds of Tonies to choose from, including plush toys; soft, squeezable silicone toys; and hand-painted, tactile, magnetic figures – each loaded with customised stories and/or songs that play when the Tonie is placed on the Toniebox.

Each Tonie character has a small chip safely embedded in it which tells the Toniebox which story to play. When you buy a Toniebox 2 from our Online Shop, you will also get a Creative Tonie, which you can use to record up to 90 minutes of your own songs, stories and messages using a smartphone and the free Tonies app for iOS or Android. You can also add free and paid-for content from the app on to a Creative Tonie.

The Tonies toy system puts children in control of their listening. There are no screens or even buttons! Squeeze the ears on top of the Toniebox to change the volume (the big ear makes it louder, the small ear makes it quieter); tap the box to skip a chapter or song; and tilt the box to fast-forward or rewind.

The Tonies are visually and tactually distinctive so that children can find the story or songs they want to listen to independently – whether that's *The Gruffalo*, by the UK's bestselling children's author Julia Donaldson, or *A Bear Called Paddington* by beloved author Michael Bond – and simply place it on top of the Toniebox to activate the audio.

For more ways to get the most out Tonies for blind and partially sighted children, head to our Shop Blog: <https://shop.rnib.org.uk/blogs/news/is-a-toniebox-good-for-children-with-sight-loss>

Toniebox 2 is available in five colours: red (TONB-R), pink (TONB-PK), grey (TONB-GY), light blue (TONB-U), and teal (TONB-T).

Please note, all Tonies require a Toniebox to work.

Cuddle Tonies

These plush Tonies are made from super-soft fleece and attach magnetically to your Toniebox 2 to play related stories and songs. Perfect for quiet play or winding down before bed. For children aged 3+.

Disney Olaf TON01

Disney Stitch TON04

Available from early July:

Disney Simba TON02

Disney Winnie the Pooh TON03

My First Tonies

My First Tonies are suitable for children aged 12 months and older. Soft, squishy shapes (animals or transport themed) that are perfect for growing the vocabulary, strengthening the listening skills, and developing the language skills of the littlest listeners. Each Tonie features a fun, original song to sing, and move along to, plus a short, simple story and real animal or transport sounds. The silicone Tonies are easy to wipe clean and have been designed for little hands.

Farm Set Tonie TON25

Travel Set Tonie TON26

Night Light Tonie – Sleepy Penguin Tonie

Designed to help little ones drift off, this Sleepy Penguin Night Light Tonie glows gently while playing up to 75 minutes of calming melodies and soothing sounds, including waves and light wind.

This rechargeable night light Tonie has four dimmable light settings (usable on or off the Toniebox), a 30-minute sleep timer, and the option to personalise with your own bedtime story via the Tonies app – it's made to comfort little ones and ease them into dreamland.

Suitable for ages 1+.

Be loud and proud

Share your love, appreciation and pride for your favourite members of the LGBTQIA family this June with one of our inclusive Pride greetings cards. Each one features a colourful, tactile image and large print and braille greeting. As with all our inclusive greetings cards, they can be posted using the Articles for the Blind scheme.

Inclusive Love with Pride charity card

Features a tactile, heart-shaped intersex-inclusive Progress Pride flag above the message 'Love with Pride' in large, red, tactile text and contracted braille.

XC115

Inclusive Pride flag charity card

Fly the flag for your favourite members of the LGBTQIA family with this tactile, Pride flag design above the message 'I'm PROUD of you' in large, white tactile text and contracted braille. 'PROUD' is spelt out in red, orange, yellow, green and blue letters, mirroring the rainbow colours of the six-stripe Pride flag flying above.

XC116

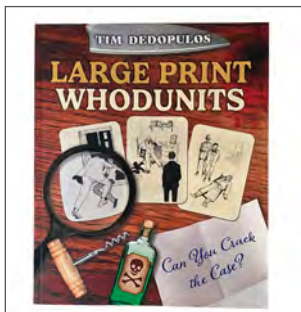

Inclusive Rainbow Pride charity card

A tactile six-stripe Pride flag fills the front of the card, with tactile text that reads 'When I am with you I am full of Pride' over the top.

XC117

Strain your brain, not your eyes

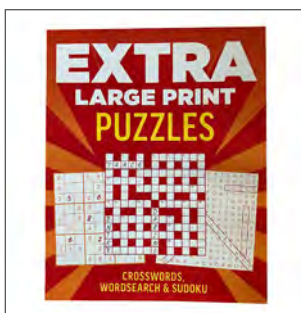

Our newest large print puzzle books include four books with extra-large type and a collection of large print whodunits. Perfect with your mid-morning cuppa or on your summer break.

Large Print Whodunits

Test your little grey cells against 21 mysteries in this large print puzzle book – perfect for armchair detectives and would-be sleuths. Each puzzle contains everything you need to solve the mystery and identify the culprit. Simply read each intriguing case and spot the omission, falsehood, or incongruity that gives the game away. Divided into two levels of difficulty, each case comes with at least one hint to help you if you get stuck. Puzzles and solutions are all in 17-point font for easier reading (hints are in 16-point font).

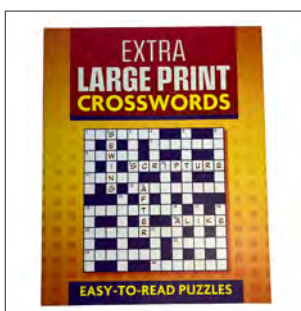

PZ032

Extra Large Print Puzzles

52 extra-large print puzzles, including Sudoku, wordsearches and crosswords. Clues and puzzles are in 26-point type for stress-free solving... (Solutions at the back – 16-point font for crossword and Sudoku solutions, 14-point font for wordsearch solutions.)

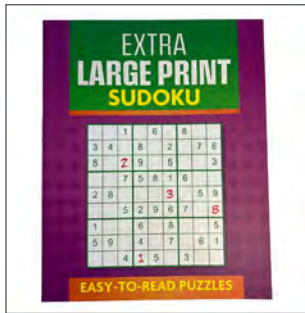

PZ033

Extra Large Print Crosswords

41 easy (non-cryptic) crossword puzzles in extra-large print (puzzles and solutions in 26-point type).

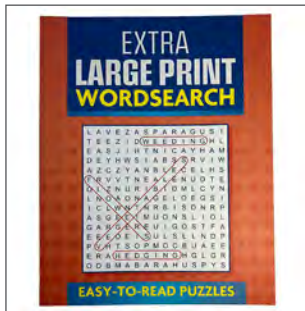

PZ034

Extra Large Print Sudoku

60 Sudoku puzzles in extra-large print (puzzles in 26-point type, solutions in 18-point at the back of the book). Four levels of difficulty from Beginners' through to Challenging – perfect for anyone new to these enjoyable logic puzzles and for experienced Sudoku solvers.

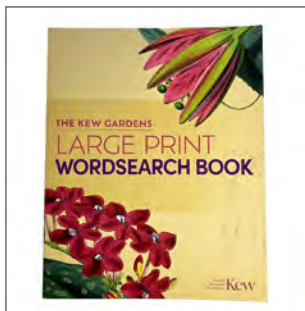

PZ035

Extra Large Print Wordsearches

41 wordsearch puzzles in extra-large print (puzzles in 26-point type, solutions in 13-point at the back of the book).

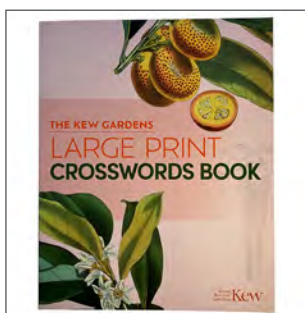

PZ036

The Kew Gardens LP Wordsearch Book

73 botanically themed wordsearches inspired by the Royal Botanic Gardens, Kew, with delightful botanical illustrations ornamenting each page. Perfect for puzzle solvers of all abilities, whether you know your asters from your elder or you're simply a puzzle fan, you're bound to learn something new. Clues and wordsearch grid letters are in 18 point with the solutions in 13 point.

PZ037

The Kew Gardens LP Crossword Book

This large print puzzle book, published in association with The Royal Botanic Gardens, Kew contains 73 easy (non-cryptic) crosswords and a bonus plant-related word hidden in each puzzle. Clues and keyword solutions are printed in 16 point font and solutions in 15 point.

PZ038

Explore our Apple range

With their out-of-the-box accessibility, sleek but robust engineering, and ease-of-use, iPhones and iPads can be a terrific way to stay connected.

Both the iPhones and iPads have a wide range of accessibility features, including VoiceOver, Zoom, Magnifier, Spoken Content, Voice Control, Siri and Dictation, and Audio Descriptions. You can turn VoiceOver on as soon as your iPad powers up, by triple-clicking the top button on the device, to help with setting up your device. You can also double-tap the screen with three fingers to turn on Zoom.

iPhone

Choose from four iPhones – iPhone 15 Black 128GB, iPhone 15 Black 256GB, iPhone 16e Black 128GB, iPhone 17e Black 256GB – all feature-packed, with a beautifully bright Super Retina XDR display, 5G-capable, and accessible straight out of the box. With Face ID so that you can securely unlock your device and even use Apple Pay for contactless payment or online shopping, with just a glance.

iPhone 15

The iPhone 15's A16 Bionic chip powers all kinds of advanced features, including computational photography for 24MP photos and next-gen portraits; Voice Isolation for phone calls; and smooth performance for graphics-intensive games. All with incredible efficiency for great battery life.

Designed to be robust, the iPhone 15 screen uses Ceramic Shield technology – which is tougher than iPhone glass, scratch-resistant and better able to withstand being dropped – and is water-resistant to a depth of six meters for 30 minutes (and dust-resistant too).

Recharge on a wireless or MagSafe charger, or connect to a 20W fast-charge adapter to go from zero to 50 percent in 30 minutes.

iPhone 15 Black 128GB APM30-128K

iPhone 15 Black 256GB APM30-256K

iPhone 16e

The iPhone 16e's A18 chip makes everything from scrolling through photos to creating images with Apple Intelligence run fast and smooth. And with the 4-core GPU, even the most demanding mobile games play effortlessly and come to life through blazing-fast graphics. All with incredible efficiency for super-sized battery life (up to 26 hours of video playback or 90 hours of audio playback).

Apple Intelligence is the personal intelligence system that helps you write, express yourself, and get things done effortlessly. You can also use visual intelligence through the Action button or Control

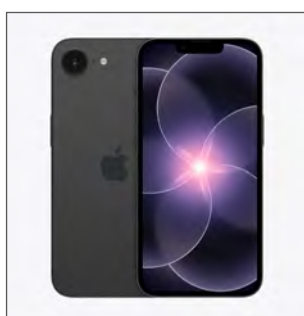

Center to instantly learn about objects and places you see. Just point your iPhone 16e to discover more or interact with something in front of you. Pull up reviews of a restaurant you pass, search for where to buy a new item you spotted, and more.

The iPhone 16e screen also uses Ceramic Shield technology and is water-resistant to a depth of six meters for 30 minutes (and dust-resistant too).

Recharge on a wireless charger, or connect to a 20W fast-charge adapter to go from zero to 50 percent in 30 minutes.

iPhone 16e Black 128GB

APM29-128K

iPhone 17e

The iPhone 17e's A19 chip makes everything from scrolling through photos to creating images with Apple Intelligence feel fast and fluid. Streaming and gaming are smooth and responsive.

Apple Intelligence is the personal intelligence system that helps you write, express yourself, and get things done effortlessly. You can also use visual intelligence to instantly learn about objects and places you see. Just point your iPhone 17e to discover more or interact with something in front of you. Pull up reviews of a restaurant you pass, search for where to buy a new item you spotted, and more.

The customisable Action button can be used with a long press to launch your favourite feature – Silent Mode, Focus, Camera, Visual Intelligence, Torch, Voice Memo, Recognise Music, Translate, Magnifier, Controls, Shortcut or Accessibility.

iPhone 17e is designed with a durable aluminium frame and has Ceramic Shield 2 on the front,

providing 3× better scratch resistance than iPhone 16e. Tougher than any smartphone glass, it protects your iPhone from those inevitable slips and drops. And it's water-resistant to a depth of six meters for 30 minutes (as well as dust-resistant).

Recharge on a MagSafe or Qi2 wireless charger, or connect via USB-C to a 20W fast-charge adapter to go from zero to 50 percent in 30 minutes.

iPhone 17e Black 256GB

APM29-256K

iPad

Choose from three 128GB iPads – Apple iPad Air 13-inch, Apple iPad Air 11-inch, Apple iPad 11-inch – all with a stunning Liquid Retina display, a 12MP front camera for video calls, Touch ID for security, and super-fast wi-fi. All are accessible right out of the box, so you can use them for work, study, play and creativity straight away.

The iPad's high-resolution Liquid Retina display is perfect for watching TV and films or video chatting with loved ones. Apple's digital assistant, Siri, can help with everyday tasks like sending messages, setting reminders and more. Use just your voice or Type to Siri to make calls, set timers, play music, get directions, or check the weather.

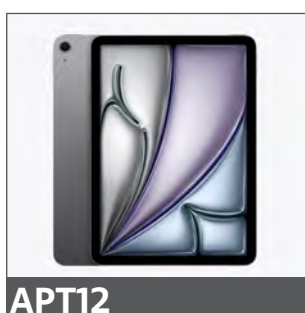

Touch ID means you can securely unlock your device with your fingerprint – and even use Apple Pay for online shopping.

iPad case

Protect your iPad with a black case that doubles as an iPad stand for video calls and watching films and TV shows.

Made of black thermoplastic polyurethane (TPU) with a transparent polycarbonate back shell, these folio cases are designed to shield your iPad from bumps and knocks and provide drop protection.

The soft TPU sides shield your device from bumps and impacts, while ensuring full access to all controls including Touch ID, volume buttons, and ports.

Four air-cushioned TPU bumper corners give added drop protection and a strong, magnetic front cover doubles as a stand to keep the iPad stable for writing or watching.

The case includes a built-in stylus holder that securely stores an Apple Pencil, with a side hole for easy access, and also supports auto wake/sleep functionality when the lid is opened or closed, helping to extend battery life.

Another option for keyboard users

Our popular large print keyboard with detachable light is now available in four colour options. We've just added black on white to the existing range (white on black, yellow on black, black on yellow).

These large print, premium quality keyboards have a detachable light that can be angled over the keys and use high contrast 42 pt. font.

Please note that this keyboard for Windows computers has a US layout which means a few symbol keys are in a different place to a keyboard with a UK layout.

Large print keyboard with detachable light – black on white HK75

More power to your devices

Keep your rechargeable devices powered up with our new charging plugs. These compact, white 20W adaptors deliver efficient, fast charging for phones, tablets, lights, magnifiers, audio players and more. Choose a USB-C charging plug or the dual-port USB-C and USB-A plug. (You can charge two devices simultaneously with the dual-port adaptor.)

Don't just stand there, let's get to it...

Keep your finger on the pulse of fashion and culture with Vogue magazine – now available, free of charge, from our Shop every month in braille. Get all the latest style news from fashion week updates and celebrity style to beauty coverage and culture reviews in contracted braille. Just search 'Vogue' on the Shop to find the latest edition.

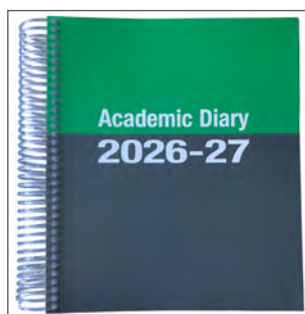

Inclusive cards to mark the end of the academic year

As schools, sixth forms, colleges and universities wind down for the summer, we've got a range of inclusive greetings cards to meet the moment. There are congratulations cards for those sitting GCSEs, Highers, BTECs, AS- and A-levels; cards for students graduating from university; and thank you cards for teachers. All with easy-to-see, tactile designs and braille and large print greetings.

Call today 0303 123 9999

BACK TO SCHOOL

As night follows day, so must a new academic year follow the long summer break... You might not have reached the point where you're wishing you could pack the kids off to bale hay all day, but now's the perfect time to plan ahead for the new school year.

RNIB Big Print Academic Desk Diary 26-27

This large print academic desk diary has plenty of room for noting homework deadlines, extra-curricular activities, and topic confidence; as well as timetable grids, reading lists, monthly goals and priorities, and term dates.

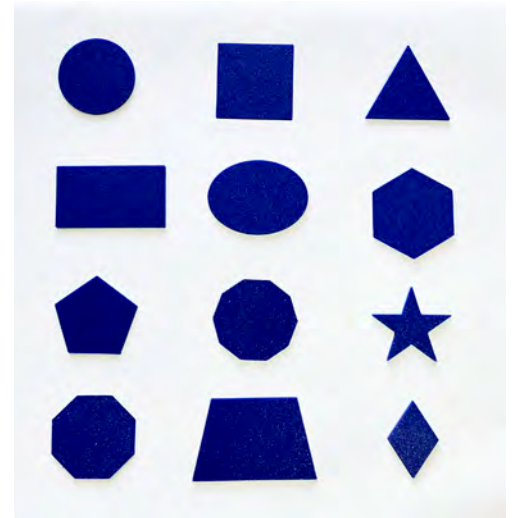

It includes monthly planners from July 2026 to August 2027 in a grid format, with a to-do list and a term dates section (autumn 2026 to autumn 2027).

DS0827

3D Tactile Shapes

This pack of 3D tactile shapes helps children with vision impairment learn common geometric shapes. It contains 12 shapes: triangle, square, circle, rectangle, pentagon, diamond, star, trapezoid, hexagon, oval, octagon, and decagon.

The pack can be used on its own to help learners familiarise themselves with these common geometric shapes, or combined with the Tactile Education Pack (LB34). The 2mm-deep, blue 3D shapes fit exactly inside the raised, tactile lines on the thermoform sheets in the pack.

ET47

Tactile Foam Dice

This large, yellow and black foam dice has dots that can be felt – ideal for games and activities for blind and partially sighted people of all ages, and useful as an educational tool for younger learners.

This soft, yellow dice is made of high quality, coated PU foam with indented black dots that can be felt. It measures 14 × 14 × 14cm and can be used for a wide variety of games and activities.

It is easy to clean with lukewarm water and a mild detergent.

GB101

New Rules of Unified English Braille

Brailleists will be pleased to know they can now order a hard copy of the updated Rules of Unified English Braille – the definitive reference book for UEB.

This 2024 edition covers everything from the alphabet and basic signs through to the rules for contracted braille, symbols, and accented letters, as well as an appendix listing all the UEB signs. Please note, this is a reference book and not suitable for learning braille. As well as some additions and clarifications, this third edition of the Rules of Unified English Braille also contains an index to make the rulebook easier to use.

Available in large print or contracted braille. This book can also be downloaded from <https://iceb.org/publications/ueb/> as a PDF or BRF.

Good luck cards

Let someone know you're rooting for them with our new inclusive good luck cards – easy-to-see, tactile designs with large print and braille messages. Also eligible for posting under the Articles for the Blind scheme. Browse <https://shop.rnib.org.uk/collections/greetings-cards>

Ravencourt Talking Easy Music Player (USB and Radio)

This simplified music player can be set to your favourite DAB radio station, play audio from a USB stick, or be used as a Bluetooth speaker to play music, podcasts and more from a smartphone or tablet. With its clear voice guidance and easy one-button operation, users can confidently navigate the player without confusion or complicated controls.

The Talking Easy Music Player has been specially designed to make listening to music simple, enjoyable, and accessible for everyone. Its simplified functions, single button, and voice guidance make it easy to listen to the music or spoken content you want. If you find traditional radios and music systems difficult to use because the controls are hard to understand, stations are easily lost or complex menus are frustrating, the intuitive, accessible design of the Talking Easy Music Player may be for you.

From the moment it's switched on, the player will verbally guide you through functions and menus. As different options are highlighted, it will clearly speak the selected function, radio station, or playback mode aloud, making it ideal for people with dementia, sight loss, reduced dexterity, or anyone who benefits from additional audio support.

In addition to DAB radio, the player also supports Bluetooth, USB, and AUX connectivity, allowing you to enjoy music in multiple ways. These features can be easily accessed by holding the top button for five seconds, while the voice guidance helps you understand exactly which mode is selected.

The Talking Easy Music Player also features a clear, high-contrast display for improved visibility and ease of use.

This portable device is rechargeable but can also be mains powered (recommended if you're using the player all day). Battery life when playing a USB stick is about six hours; for Bluetooth playback or DAB radio, it's about 12 hours.

HD16

Rechargeable Motion Sensor Light

This rechargeable motion-activated light gives hands-free light in low light and darkness – ideal for anyone who needs to get up in the night or for use in cupboards and wardrobes.

Similar to our popular, battery-powered Motion Sensor Light (DH499), the Rechargeable Motion Sensor Light can be placed along a skirting board or fixed inside a dark cupboard, wardrobe or drawer to get a bright white beam of light when movement is detected up to three metres away.

The light only activates in low light conditions and turns off 30 seconds after movement stops to preserve battery life.

Ideal for lighting dark cupboards, wardrobes, or drawers, or for providing low-level lighting in hallways or other dim areas. The light swivels within its frame, allowing you to angle it as required. The light can be fixed to any flat, dry, indoor, or weather-protected surface using screws or the double-sided adhesive pad provided.

It recharges via a USB-C port in approximately 2.5 hours. A full charge, with average use (ten activations of ten seconds each day), will give you

just over two months' use. Standby time is 20 to 22 months. Charging cable included.

RNIB Talking Cube Clock

You can still hear the time announced at the press of a large yellow button, but our Talking Cube Clock has been given a makeover and now gives you the choice of a male or female voice.

Now in a sturdy black plastic case, our lightweight clock looks modern and stylish, while still being a practical option for anyone who wants an easy-to-use talking clock.

One press of the tactile yellow button will make it speak the time in a natural English voice, a second press will make it speak the date as well. Volume is easily adjusted using the tactile yellow dial on the front of the clock.

Options in the setting menu are spoken, with a beep confirming your choices. The clock has an optional alarm and optional hourly announcement function.

Requires two AA batteries (included).

RNIB Eyeshield Glasses

Our new and improved eyeshield glasses will be available in three styles including fit over and wraparound. All the eyeshield glasses now feature nylon lenses which are more scratch resistant and have high-quality multi-layer anti-reflection coating that eliminates unwanted reflections off the back of the lens to maximise visual comfort.

Both the fit over and wraparound styles will be made of a lighter, more flexible, and durable material called TR90 (commonly used in high-end, branded fashion sunglasses) with a matt, rubberised finish.

RNIB Fit Over Eyeshield Glasses

Designed to effectively block glare from the top, sides and bottom to help with light sensitivity. The arms on the new fit over range have easy-to-adjust bendable rubber tips for a perfect fit and the side windows will be the same colour as the lenses, giving the same effective glare protection from all directions.

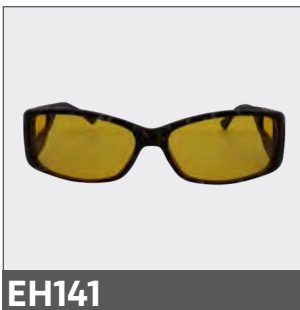

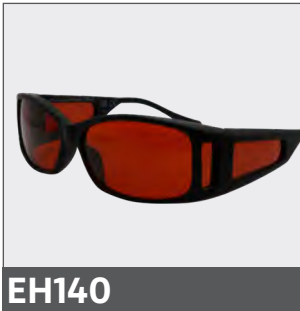

Available in two sizes to fit easily over a range of different sized glasses. Medium will fit over glasses up to 138mm wide × 40mm deep, while Large will fit over glasses up to 146mm wide × 47mm deep.

The Large fit over glasses are available in matt black (EH136) with a choice of yellow, orange, brown, grey or green lenses, or in matt grey tortoiseshell (EH137) with a choice of yellow, brown or grey lenses.

The Medium fit over glasses are available in matt black (EH138) with a choice of yellow, orange, brown, or grey lenses, or in matt brown tortoiseshell (EH139) with a choice of yellow, brown, grey or green lenses.

RNIB Wraparound Eyeshield Glasses

These modern, stylish eyeshield glasses have a wraparound design that fits close to the face providing excellent all-round protection from glare. Please note, these do not fit over prescription glasses. These small to medium-sized glasses have an internal width of 130mm.

Available in matt black (EH142) with a choice of yellow, orange, brown, green, or grey lenses, or in matt brown tortoiseshell (EH143) with a choice of yellow, brown, or grey lenses.

RNIB Medium Eyeshield Glasses

Designed to look like regular sunglasses, these provide excellent glare protection from the top and sides to help reduce light sensitivity. Please note, these do not fit over prescription glasses.

These eyeshield glasses have full-length side windows the same colour as the lenses, giving the same highly effective glare protection from all directions. Internal size 140mm × 40mm.

Available in matt black (EH140) with a choice of yellow, brown, or grey lenses, or in matt grey tortoiseshell (EH141) with a choice of yellow, brown, or grey lenses.

Be My Eyes Workplace

Be My Eyes Workplace combines human and AI support to make otherwise inaccessible workplace information fully accessible to employees who are blind or have low vision. It helps users to navigate complex screens and content; interpret inaccessible documents such as PDFs; and connect and screenshare with trusted colleagues or agents. One-year subscription download.

Instead of focussing on a single task Be My Eyes Workplace takes a comprehensive approach to workplace accessibility. Designed to work seamlessly across screens, documents, and workflows, it does not replace your existing accessibility software; but

acts as the perfect companion to screen readers, braille displays, and magnification software, by closing the gaps those tools cannot cover on their own.

Key features

Workplace AI: An AI-powered desktop assistant that instantly describes windows, graphs, images, and other on-screen content using simple keyboard shortcuts – unlimited access.

Workplace Reader: Upload a PDF or a PPT, and Workplace Reader will summarize the document, give a high-level overview of each page, allowing you to skim through the document, or dive deeper simply by asking a question. Works with both accessible and inaccessible documents.

Workplace Connect: Real-time support made easy. With one click, employees can reach a trusted colleague or support person through voice, optional screen sharing, and temporary remote control.

Optional service: Outsourced Agents – access to specially trained external agents from RNIB to provide visual help if internal support is unavailable. (Additional set-up costs, plus fixed monthly billing or per minute billing.)

Please note, Be My Eyes Workplace is compatible with Windows operating systems only.
