Choosing your cane

If you'd like advice on the right cane for your needs, or to arrange cane training for yourself or a relative, please contact your local society or Social Services team for assistance. Contact our Helpline for help finding your local service.

Specialist training is needed to use a long cane safely and effectively. We also recommend getting advice from a professional before purchasing a guide cane.

Cane measurements are from the top of the handle to the bottom end of the tip, increasing in steps of 5cm (2 inches). Special order lengths: 30cm to 60cm (12 to 26 inches) or over 150cm (60 inches) to 180cm (72 inches).

Personalised canes

Please call our Helpline to order your personalised cane. Your bespoke cane cannot be returned unless it is faulty and can take up to six weeks for delivery.

Shaft colour: Pick a single colour or a mix from: White, Red, Pink, Yellow, Red Stripes, Green, Gold, Blue, Orange, Purple, and Black.

HiLite colour: Add a golf-grip handle and a tip in the same colour. Choose from four fresh, bright colours: Blue, Green, Orange, or Pink.

Grips: Standard canes are fitted with a black golf-grip handle; personalise your cane with a brightly coloured golf-grip HiLite handle, a wooden handle or a cork handle.

Delivery: Special order-length and personalised canes cannot be returned unless they're faulty and can take up to six weeks for delivery.

Symbol canes

Increase confidence when you're out and about with a symbol cane to highlight to other people that you have sight and/or hearing loss. These reflective, lightweight aluminium canes fold for easy storage in your bag when not in use. They're fitted with a eyelet ID tip. They do not have a handle grip and cannot be personalised.

Ambutech symbol cane

White

MS20 is 70cm (28")

MS22 is 85cm (34")

MS23 is 100cm (40")

MS25 is 105cm (42")

Deafblind (white and red)

MS40 is 70cm (28")

MS41 is 85cm (34")

MS42 is 100cm (40")

MS43 is 105cm (42")

Guide canes

Guide canes help you find obstacles before they find you! These four-section canes are made from durable aluminium and are fitted with a hook-style tip. They do not have a handle grip.

Ambutech guide cane with pencil tip

MG16 is 85cm (34")

MG31 is 95cm (38")

MG35 is 115cm (46")

MG32 is 100cm (40")

MP26 – replacement tip

Long canes

A long cane should reach between your sternum and under the chin when you're standing upright and the cane tip is touching the ground between your legs. The length and speed of walking stride will also affect the length required. Long canes are rolled or tapped from side to side, to find your way and avoid obstacles.

Ambutech folding aluminium long cane

Popular lengths

Fitted with a roller marshmallow tip

ML56 is 120cm (48")

ML58 is 130cm (52")

ML57 is 125cm (50")

Children's canes

Three-section, folding Ambutech aluminium long canes for children. Fitted with a white hook-style roller marshmallow tip and a shorter black golf-grip handle with no flat edge.

Children's Ambutech folding long cane (MC05-08)

Add White, Pink, Blue, Yellow, or RedWhite to the end of the product code to order your desired colour and length. For example: **MC05White** for a 70cm white cane.

MC05 is 70cm (28")

MC06 is 75cm (30")

MC07 is 80cm (32")

MC08 is 85cm (34")

Cane tips

Hook-style cane tips are the most popular. Many tip styles are also available in thread or push-on style – only suitable with canes that use that tip style.

Handy accessories

Cane hook (MP80)

A small device to hook your cane on to flat surfaces, such as a tabletop, or rest it on the back of a chair, leaving your hands free until you want to use your cane again.

Reflective tape (MP04 and MP06)

Revitalise your cane with a fresh strip of reflective tape.
Red – **MP04**, White – **MP06**.

Eyeshields

Designed to exclude harmful ultraviolet (UV) and blue light, which can damage the retina. The different filter tints can help increase contrast and definition. Your eye specialist can advise you which filter colour would best suit your needs. More styles available.

Orion

Lightweight, transparent brown plastic frame with additional protection across and above the eye. Designed to be worn over your own prescription glasses or on its own.

Saturn

An attractive, transparent brown frame designed to offer excellent side protection due to the wraparound style fitting close to the face.

Braille and labelling

Stay organised with our wide range of braille and labelling products. Whether you need to produce an essay in braille, take note of a phone number or add tactile marks to everyday objects, we have something to suit your needs.

Orange BumperStops (DL25)

These small adhesive rubber dots provide a simple and effective way to label everyday items.

Clear labelling sheets (DL11)

Clear Perkins-size labelling sheets which can be embossed on to using a braille machine or a hand frame and then cut to the required size.

Band-it (DL120)

Brightly coloured tactile bands to help you identify objects around the home, such as shampoo bottles and cleaning products. Each pack contains 10 flexible, reusable bands; two of each design.

RNIB PenFriend 3 (DL121)

Our easy-to-use labelling device lets you record your own voice on to sticky labels which you can attach to a wide range of items, such as spice jars, your CD or vinyl collection, clothing and beauty products or your plant

seed packets. Simply touch the PenFriend to the label to hear back your recording, for easy identification. Store up to 250 hours of recording. Supplied with 127 labels, 10 magnets, one keyfob. More labels, including laundry labels, are available.

Loc Dots (DL16, DL90)

Thin, flat stickers with a single raised dot in the centre – useful for identifying computer and laptop keys, central heating or stereo controls.

Tacti-Mark (DL40, DL40A)

A liquid plastic that sets hard, allowing you to create your own tactile marks on clothing, paper, metal and hard plastics. Available in orange or black.

Perkins Classic brailier (BM36)

Versatile, mechanical writing machine for producing braille up to 42 characters per line. Upwards embossing to check braille as you write.

Braille labeller (DL65)

This handheld labelling machine makes it easy to produce braille labels, even without knowledge of braille. Produces uncontracted braille and some contractions.
